If our policies to tackle illegal drugs
are working, why are we talking
about it?

... scrub that!

Why are we not talking about it?

Summary

Background

Some heroin addicts persistently fail to benefit from conventional treatments. We aimed to compare the effectiveness of supervised injectable treatment with medicinal heroin (diamorphine or diacetylmorphine) or supervised injectable methadone versus optimised oral methadone for chronic heroin addiction.

Methods

In this multisite, open-label, randomised controlled trial, we enrolled chronic heroin addicts who were receiving conventional oral treatment (>6 months), but continued to inject street heroin regularly (>50% of days in preceding 2 months). Randomisation by
