

Valuable conversations: Applying TICP and MI to alcohol use during pregnancy

Presented by
Workforce Development, Mental Health Commission

The Valuable Conversations training covers the following:

- **Reflective practice** to identify areas of practice that require development for improved client engagement and outcomes.
- **Trauma Informed Care and Practice (TICP)** to consider the broader context in which alcohol use may be occurring.
- **Motivational Interviewing (MI)** to develop compassion, acceptance, partnership and evocation (Spirit of MI).
- **Fetal Alcohol Spectrum Disorder (FASD) prevention** in the context of the National Strategic Action Plan and a holistic prevention framework.
- **Brief Intervention (BI)** to combine course content with skills practice using the AUDIT-C and 'Five As'.

This **is not** an introductory course to FASD and **does not** provide information on FASD diagnosis or treatment.

Prior FASD knowledge is highly desirable but not compulsory. Please contact Dionne to discuss other learning opportunities prior to this event.

Training dates and locations for Semester 1, 2021

- Geraldton: 23 - 24 February
- Bunbury: 16 - 17 March
- Perth: 28 - 29 April
